ATTN: US DEPT OF JUSTICE

RE: MICROSOFT

Microsoft has made it possible for small businesses like us to afford computers and increase efficiency. Anti-Microsoft companies like Sun, Oracle, Apple et al offer software which is too expensive for the small business/home owner/student.

If Sun, Oracle, Apple, Netscape-AOL had competitive products, the market would have rewarded them accordingly. The negative attitude by Microsoft's competitors is truly un-American -where the market rewards companies with the best values in service and products.

It is time to let Microsoft innovate freely!!

Very truly yours,

Jerome R. Bulkan
